Re: Official Listing
NSF Nonfood Compounds Registration Program

Dear Mr. Wylie:

It is my pleasure to confirm your Company's Official Listing for the NSF Nonfood Compounds Registration Program.

DRY LUBE LIMITED is authorized to use the NSF Registration Mark for products specified on the enclosed Listing.

As an NSF Listed Company, you are responsible for compliance with all NSF requirements for Registration services. Please note that your Listed products must bear the NSF Registration Mark unless specifically exempted by policy.

The enclosed certificate(s), suitable for framing, may be displayed at your Corporate location. Additional copies may be purchased by contacting your NSF Registration Project Manager, Dorothy J. Erby at 800-NSF-MARK or 734-913-5763.

Please contact your NSF Registration Project Manager if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads 'Marie S. Belanger'.

RE: CONVEYOR LUBE H1
Category Code: H1
NSF Registration No. 137484

Dear Mr. Ian Wylie:

NSF has processed the application for Registration of **CONVEYOR LUBE H1** to the NSF Registration Guidelines for Proprietary Substances and Nonfood Compounds (2004), which are available at <http://www.nsf.org>. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling.

This product is acceptable as a lubricant with incidental food contact (H1) for use in and around food processing areas. Such compounds may be used on food processing equipment as a protective anti-rust film, as a release agent on gaskets or seals of tank closures, and as a lubricant for machine parts and equipment in locations in which there is a potential exposure of the lubricated part to food. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust film, the compound must be removed from the equipment surface by washing or wiping, as required to leave the surface effectively free of any substance which could be transferred to food being processed.

NSF Registration of this product is current when the NSF Registration Number, Category Code, and Registration Mark appear on the NSF-approved product label, and the registered product name is included in the current NSF White Book Listing of Nonfood Compounds at the NSF website (<http://www.nsf.org>). The NSF Registration Mark can be downloaded from the NSF website, at http://www.nsf.org/business/about_NSF/nsf_marks_download.asp.

NSF Listing of all registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficacy claims made by the manufacturer.

Registration status may be verified at any time via the NSF web site, at <http://www.nsf.org>. Changes in formulation or label, without the prior written consent of NSF, will void registration, and will supersede the on-line listing.

Sincerely,

Carmen Grindatti
